Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 13-15 drawn to a pharmaceutical composition comprising ovine interferon tau, classified in class 424, subclass 85.4
- II. Claim 12, drawn to a pharmaceutical composition comprising ovine interferon tau and ribavirin in combination, classified in class 514, subclass 43, e.g.
- III. Claims 16 and 17, drawn to a method of monitoring HCV treatment by measurement of 2', 5'-oligoadenylate synthetase, classified in class 435, subclass 4+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an oral delivery vehicle or any particular dose. The subcombination has separate utility such as in affinity purification of anti-interferon tau antibodies.

Inventions III and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different

Art Unit: 1648

process of using that product (MPEP § 806.05(h)). In the instant case the product can be used in a materially different process of using such as in affinity purification of anti-interferon tau antibodies.

The product of Group II is not required for the practice of the method of Group III.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and because the search for any one group is not coextensive with the search required for any other group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
